

VANSH BHURA

Computer Science Student — Artificial Intelligence & Machine Learning

Bikaner, Rajasthan, India | +91 90246 53905 | vanshbhura453@gmail.com | github.com/vanshbhura | linkedin.com/in/vansh-bhura

SUMMARY

Third-year B.Tech Computer Science (AI & ML) student with hands-on experience building and deploying full-stack, AI-integrated web applications. Skilled in Python, Java, and modern JavaScript frameworks, with practical exposure to Retrieval-Augmented Generation (RAG), LLM API integration, and cloud deployment. Hackathon winner with a track record of shipping end-to-end projects as a solo developer.

SKILLS

- Programming Languages: Python, Java, C
- Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP)
- Web Development: Next.js, React, TypeScript, Node.js, Express, Tailwind CSS, HTML, CSS, JavaScript
- AI/ML & LLM Integration: Anthropic Claude API, Groq API (Llama 3.3), LangChain, ChromaDB, HuggingFace Embeddings, Retrieval-Augmented Generation (RAG), Google Gemini 2.5 Flash
- Tools & Platforms: Docker, Google Cloud Run, Supabase, Clerk Authentication, Git, GitHub, Cloudinary
- Certifications: Prompt Engineering for Everyone (IBM SkillsNetwork / CognitiveClass.ai); Intro to Machine Learning, Intro to SQL (Kaggle Learn)

EDUCATION

NIMS University, Jaipur

Expected 2028

B.Tech in Computer Science & Engineering (Artificial Intelligence & Machine Learning) — CGPA: 8.3

EXPERIENCE

AI/ML Intern — Averix Solutions (in partnership with Google Cloud)

Aug 2026 – Present

- Working on model training and ML pipeline development as part of an AI/ML internship delivered in collaboration with Google Cloud

Machine Learning Intern — EdiGlobe (Ediglobe Techsphere Pvt. Ltd.)

May 2026 – Jul 2026

- Built an Enterprise AI Knowledge Hub, a Retrieval-Augmented Generation (RAG) based document Q&A system using LangChain, ChromaDB, HuggingFace embeddings, and Google Gemini 2.5 Flash
- Completed one minor and one major project under the Machine Learning training program; delivered a working RAG pipeline for enterprise document search and question answering, and produced a 9-page technical report summarizing the system architecture and results

PROJECTS

HealthSync — Doctor & Patient Management Platform

github.com/vanshbhura/healthsync-app

- Built a full-stack healthcare management application with a Node.js/Express backend and a glassmorphism HTML/CSS/JS frontend, containerized with Docker and deployed on Google Cloud Run
- Implemented an AI-powered Symptom Checker using the Anthropic Claude API to provide patients with preliminary triage guidance
- Designed a Doctor Availability Heatmap, a Drug Interaction Warning system, and a longitudinal Patient Health Timeline

BrainRot Dictionary — Gen Z Slang Reference & AI Translator

- Developed a full-stack web application for Gen Z slang lookup using Next.js 14, TypeScript, and Tailwind CSS, with Supabase for data storage and Clerk for authentication
- Integrated the Groq API (Llama 3.3) to power an AI dictionary/translator with four translation modes, an interactive quiz feature, and an 'aura points' leaderboard

HACKATHONS & ACHIEVEMENTS

- Winner, Code Crunch — India Is Innovating 2026, held at Suresh Gyan Vihar University
- 1st Position, NIMS IDEathon 2.0 (Team Power Glow) — NIMSU Sushma Innovation and Incubation Foundation
- Built HealthSync at the AMD Slingshot Campus Days Ideathon 2026, Jaipur — a Dockerized, cloud-deployed patient management platform with AI symptom checking
- Completed the Deloitte Data Analytics Job Simulation (Forage) — data analysis and forensic technology
- Campus Ambassador, NIET (RINEX x E-Cell IIT Bhubaneswar program)
